

# Ormandy Shade

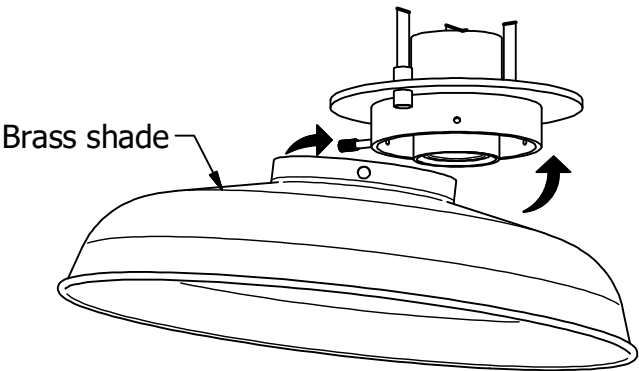

skill level ● skill level  
● toolbox

## installation instructions

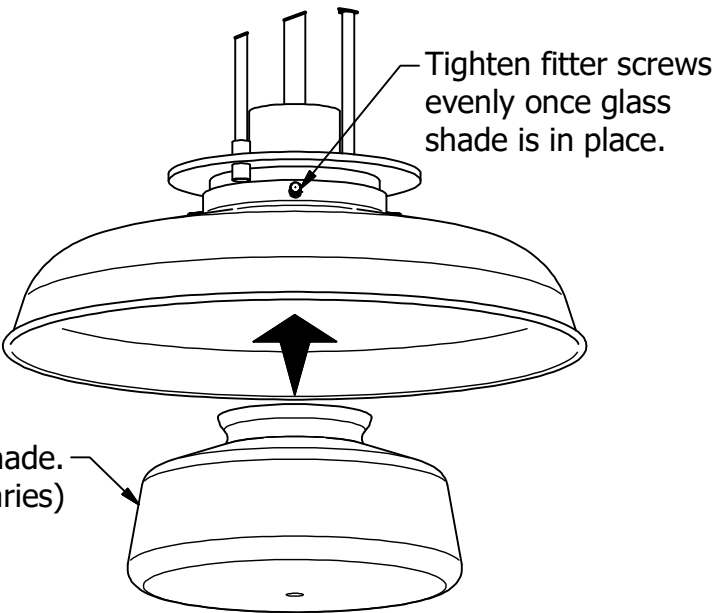

1. Insert one fitter screw into the fitter such that the threaded end of it is just flush on the inside surface of the fitter.

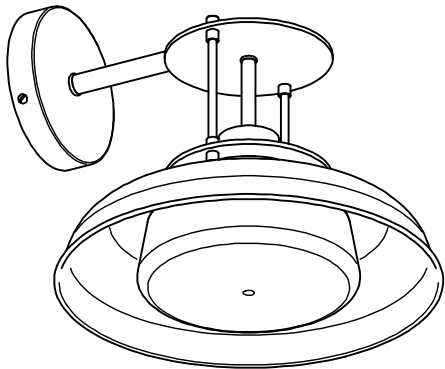

2. Slide brass shade onto fitter screw, raise brass shade into position on the fitter and install the other two fitter screws also to flush depth on inside fitter surface.

3. Lift glass shade (optional) fully into position in the fitter and hold in place while tightening the fitter screws by hand. Turn each screw equally until all three lightly support the glass shade.

*Complete !*
