#### MOUNTING INSTRUCTIONS FOR TYPICAL DRYWALL APPLICATIONS.

**Note: Consult your local hardware store for proper mounting on other wall materials.**  
**Need a helper when assembling.**

Tools Required: Phillips and slotted screwdriver, pencil, tape measure, level.

1. Carefully determine the mounting location and mark the center point on the wall.
2. Apply a piece of blue painter's tape to both mounting brackets and mark the center point of each bracket.
3. Align the center point of the bottom bracket (2pcs for horizontal mounting) with the center point previously marked on the wall. With a pencil trace the location of one of the mounting holes.
4. Use a small level to assure that the bracket(s) is/are level and mark the second hole(s).
5. At each mark, press tip of drywall anchor(s) into drywall using #2 Phillips screwdriver or screw gun with #2 Phillips bit. Drive anchor(s) clockwise until anchor(s) stop(s) flush with wall.
6. Slip the mounting screws over the Finish Cap threaded insert(s) and **temporarily** install the bottom bracket(s).
7. Carefully place the mirror into the bottom bracket channel(s) and center.
8. Slide the top bracket(s) into place and center. Mark the location of the mounting holes on the wall. Follow step 5 for installing anchors.
9. Remove the bottom bracket(s) from the wall. Install both top and bottom brackets on the mirror, securing snugly with the set screws on the back of the bracket(s) using a slotted head screw driver.
10. With the aid of a helper, install mirror with brackets securely to the wall, remembering to install Finish Cap threaded inserts.
11. Screw the Finish Caps over the Finish Cap inserts.
12. Remove the front protection film when using the mirror.

#### CARE INSTRUCTIONS

Wipe with a soft, dry cloth. To protect the finish, do not use harsh household cleaners or abrasives.
